

Performance Report Template

Target Scores

Page	Performance	Accessibility	Best Practices	SEO
Home	90+	95+	95+	95+
Portfolio	90+	95+	95+	95+
Book Consultation	90+	95+	95+	95+

Optimization Actions

- Converted large images to WebP.
- Resized hero media and portfolio images.
- Enabled LiteSpeed page cache.
- Enabled CSS, JS, and HTML minification.
- Enabled lazy loading below the fold.
- Reduced plugin usage to essential build plugins.
- Used only two font families.
- Kept animations subtle and CSS-driven where possible.

Manual QA Notes

- Sticky navigation remains readable over hero and light sections.
- Mobile menu does not overlap CTA content.
- Portfolio filter transitions are smooth.
- Before/after slider works on touch devices.
- WPForms fields are accessible and easy to complete.

- Footer links and social links are active.

Final Recommendation

Capture Lighthouse screenshots after deployment and place them inside `screenshots/` before submitting the ZIP.
